

# The Mannlicher Collector

Current Steyr factory as discussed in TMC 104"

## Biography of Ernst Reichmayr

Born in Steyr in 1957, Mr. Reichmayr grew up and lived in Weyer (20 miles from the Steyr Mannlicher factory). He graduated from Coral Gables High School, Coral Gables, FL, and from Vienna Law School, Austria (Ph. D.) His first working experience was in banking (Creditanstalt – previous owner of Steyr Mannlicher). He founded First Investment Bank in Austria and advised Eastern European countries with first privatizations after the fall of the Iron Curtain in 1989. He left investment banking to work in industry becoming CFO of Head Sports. He later joined Andlinger & Company, Inc. Tarrytown, as partner and started First Central European operations. He bought and headed various companies in Europe (sales from \$35m to \$1.5bn ). Together with his friend and partner Gerhard Unterganschnigg he bought Steyr Mannlicher in 2007.

Mr Reichmayer has family ties to Steyr Mannlicher. After WW II, his grandfather was in charge of the wooden stock production at Steyr. Both Gerhard Unterganschnigg and Er-

nest grew up hunting, and Mr. Reichmayer still owns hunting grounds near the Steyr Mannlicher factory.

Changes at Steyr Mannlicher since 2007 are significant:

- They invested \$8m in Steyr Mannlicher factory to buy new equipment and bring industrial layout and logistics up to modern standards;
- They brought in technical talents (4 young engineers plus Michael Engesser as Managing Director – he is former MD of Heckler & Koch and was head of R&D and production there);
- They restructured Steyr Arms, Inc. by bringing in new management (Scott O'Brien – brother of former GSI head of sales and now Surefire Executive Jon O'Brien) and moving back to Trussville; and
- As of February 2010, they also took over exclusive import and distribution function for Merkel and Anschütz products and merged the US operations of both organisations.

# **The History of Steyr-Mannlicher**

## **A Book Review by Thomas L. Seefeldt**

I received a copy of the *History of Steyr Mannlicher*. I ordered from Steyr Arms and I am delighted. It is what it claims to be: A history of Steyr Mannlicher. The book contains many photographs of the Steyr Werks including the magnificent Waffensall (Hall of Arms) built in 1915 and moved in its entirety to a new site in 1990. The first several pages deal in general history with photographs and biographies of the four most important men of Steyr's early development: Werndl, Holub, Mannlicher, and Schonauer. The book is laid out with color photos of firearms on the left page with a brief description on the right page. There is mention of the 'perfect' muzzle loader, the Lorenz, but the book deals mainly in the cartridge firearm realm. This begins with the 1867 Werndl through the most recent Steyr AUG and auto-loading pistols. Many variations of arms are shown. The arms in the chapters are reviewed in chronological order for the most part, so the reader gets a sense of the progression and development of the Steyr-Mannlicher firearms. Some of the chapters are military, pistol, shotgun, sporting, and edged weapons. The edged weapons are mostly bayonets. There is an excellent photograph of the Pioneers (Engineers) Sabre M.1853. I owned one of these once and regret selling it to an edged weapons collector.

Some might be disappointed by the lack of attention given to the 1903 through 1961 Mannlicher Schonauers, they are addressed but not all models. The one error I did note is the Steyr Zephyr .22 appears to be listed as first offered in 1963 while it was actually 1953, no doubt a typo.

This book is not a detailed description of the Steyr-Mannlicher firearms. It does not delve into the operations systems and internal details. It is rather a brief, concise history and a treasure of information on the basic overall production of various models of Steyr firearms. Some seldom noted arms include the Steyr SP, the M1901 pistol carbine and some early hammer shotguns. MCA members and collectors of all things Steyr and Mannlicher should appreciate this book.

The 8 1/2 x 12, 127-page book is available from Steyr Arms, the current importer of Steyr firearms, for \$85.00. The book, products and many other Steyr accessories are available from their website [www.steyrarms.com](http://www.steyrarms.com). At the site be sure to sign up for the Steyr email newsletter that is available at no cost. This will allow you to receive all the latest news and information on Steyr Arms and their products. Be sure to mention you are a member of the MCA to show our support for Steyr.

## **ATTEND THE ANNUAL MEETING**

**If you haven't been to a gun show with approximately 10 acres of tables and every imaginable firearm you may want, then you owe it to yourself to attend the Nov 12-13 2011 show in Tulsa Ok. Not by accident, we are holding our annual meeting in conjunction with this event. We have a special room rate (on a first come basis) at the Hilton. Call 918-492-5000 and tell them you are with the Mannlicher Collectors Association. The President's reception will be at 5:30PM on the 11th. Please come and make this year's event special. LEL**

## **What Others Say**

Here is what some notable gun writers had to say about our beloved Mannlicher Schoenauers. (Members are encouraged to e-mail similar finds to [lynnlevengood@gmail.com](mailto:lynnlevengood@gmail.com))

"Cartridges suitable for timber and brush hunting.  
6.5 Mannlicher Schoenauer 160 gr. At 2300 feet velocity."  
Elmer Kieth, Pg.5 Big Game rifles and Cartridges.

"The Mannlicher-Schoenauer is a light, cute little rifle, but the rotary magazine makes it difficult to convert to anything but the original caliber, the bolt handle is in the wrong place, and the action is not as strong as the Mauser."  
Jack O'Connor, pg 62 The Rifle Book

".256 (6.5mm) Mannlicher- Schoenauer. This is the smallest caliber with which you could possibly expect to have satisfactory results in general African hunting. Its 160-gr bullet has probably a better diameter-to-weight ratio than any other bullet on the market. It is very accurate and has excellent penetration, both when used as a solid and soft nose. What must surely be the world's record bag with any rifle, much less with a small bore, is held by the little 6.5mm Mannlicher-Schoenauer in the hands of Banks, recently retired from the Elephant Control staff in Uganda-three elephants to the one shot! He shot one which fell against two others, and all three of them tumbled over a precipice."  
John Taylor, pg 180 African Rifles and Cartridges

# Mannlichers Afield

Member Peter Anderson - shot this buffalo in 2007 with his 1905 MS 9x56 using a 250 gr hawk bullet.

---

## From the Archives

In addition to books, the MCA archives also has a collection of periodicals, catalogues, and other media related to Ferdinand Ritter von Mannlicher and Steyr.

The periodical collection consists of articles from various magazines and journals, and was indexed by the prior archivist (Kevin Tikker) as follows:

- B100-199: General information about Ferdinand Ritter von Mannlicher and Steyr
- B200-299: Early single shot rifles
- B300-399: Straight pull bolt action rifles
- B400-499: Mannlicher-Schoenauer models
- B500-599: Modern Steyr/Mannlicher rifles
- B600-699: General accounts that mention Mannlicher or Steyr arms
- B700-799: Steyr pistols
- B800-899: Other Steyr products
- B900-999: Mannlicher/Steyr cartridge information
- B1000-7000: Miscellaneous

Most of the articles are black & white photocopies, but we do have some original magazines. Many of these articles are the result of members sending in copies from their favorite magazines or journals, so if you see mention of Steyr

or Mannlicher in any of your reading, please make a copy and send it in! I will index it and add it into the collection.

In addition to the periodical collection the archives also has a collection of Steyr catalogues, brochures from importers, and other 'advertising literature'. This is often a valuable source of information regarding which models or options were offered.

Lastly the archives also hold a few VHS and DVD's, including a copy of the latest MCA safari to Africa.

In 2002 a catalogue of archive material was published, which contains the material indexed up to that time. There are five copies left and are available for \$10 each (including shipping). Since that date I have created an electronic index and have been adding in new additions in that format. If you are looking for information on a specific model please let me know, and I can quickly search to see what we have available.

# Load Data for Pre-WW1 Mannlicher-Schoenauer Caliber

## by H. Owen

There are very few loading sources for the early Mannlicher-Schoenauer calibers, particularly the 8x56 MS, 9x56 MS, and the 9.5x57 MS. To remedy this, I collected every published load for these calibers that I have been able to find over the last several years. About half have already been published in Mannlicher Collectors Assn. newsletters, but were scattered among the different issues. I hope that these loadings will be useful for MS owners and reloaders of these calibers. The list includes the type of powder, the weight of the bullet in grains, the quantity of powder in grains, the velocity in feet-per-second (fps), and the source of the load.

Some clarifications: I only included loads with powders that are still commonly available and only included the maximum load from a given source. I did include different loads for the same powder, amount, and bullet weight when they came from different sources (to show the difference in velocity recorded by different sources). I also included a few lesser loads that were specifically listed as being "reduced loads".

All of the bullets are jacketed unless they specifically say "cast" in the notes. All of the loads assume the bullets are correct diameter for the barrel (this is particularly a caution for the 9x56 MS loads - slug the barrel). ALWAYS REMEMBER to start 10% to 15% low and work up slowly.

If there is more than one source listed for some loads, the oldest one is listed first. The full source for the abbreviations are as follows:

1. MCA = Mannlicher collectors Assn. newsletter with the number of the issue.
2. Ideal = Ideal load books with the number of the issue.
3. Phil Sharpe = Complete Guide to Handloading book, 1941 edition
4. P.O. Ackley = Handbook for Shooters & Reloaders, 3rd printing
5. Ken Waters = Pet Loads book
6. Barnes COTW = Cartridges of the World, 8th Edition
7. H. Owen = Articles by me in MCA #80
8. C. Ebert = Article by Mr. Ebert in MCA #73

I have tried several different powders and bullets with my 9.5x57MS. IMR3031 and Norma N201 powders seem to be little bit too fast for maximum velocity and bullet weights. They work better with less than maximum velocity and/or lighter bullet weights. However, lighter bullets often have feeding problems. IMR 4064 is accurate and works well at maximum loads and bullet weights in my rifles.

## Mannlicher Shooting Contest

Because our organization advocates the SHOOTING of our cherished MS firearms, I thought it would be fun to have the membership showcase their rifles and skill by having an old-fashioned shooting contest. Enclosed in this month's TMC is the target for you to use and submit. Feel free to photocopy as many as you like, go the range, shoot some 100-yard groups from a bench using sand bags and send them in. Bragging rights and prizes will be awarded at the annual meeting in Tulsa. If you don't attend, it's OK as the results will be published in the Winter TMC and prizes mailed. The Categories will be as follows:

Scope or Iron sights

Pre 1950 7mm and smaller

Pre 1950 8mm

Pre 1950 9mm and larger

1950 and newer 7mm and smaller

1950 and newer .30 cal. and larger

Shoot as many 4 (four) shot group targets as you like and submit your targets to the TMC editor being sure to fill out the requested data on the target. If you are using factory ammo, so indicate including the bullet weight and type.

You have all summer to load ammo and shoot so I urge/expect everyone to enter, hopefully with each MS you own. Even if your rifle shoots larger groups send in your results so we can analyze the data and publish the average group size and "accuracy loads" for each caliber. LEL

## Buyer Beware

For the last few years the collection of a late, well known Mannlicher Schoenauer collector has been for sale. One of the rifles is listed as a Holland & Holland 6.5x54 screw together take down at a price of \$9300.00. I thought the price might be negotiable so I sent for photos. I had previously seen an "H & H" Mannlicher which had the top of the bbl. engraved Holland & Holland - London, but this one was not marked, so I got in contact with H&H's London expert. He assured me that if their name and location is not engraved on the bbl. and their serial number is not on the trigger guard bow, it is not their work. I contacted the seller requested and received an additional set of different photos of the same rifle which were much clearer and more detailed. The action was clearly marked system 1930, (therefore a Greek army rifle). Further research proved it was sporterized and converted to a take down and the photos show it was signed on top of the bbl. just forward of the receiver ring by Hambrusch, a gunsmith in Ferlach Austria. A nice piece, but not worth anywhere near the asking price. Tom Tompkins

## Odds and Ends

CHECK OUT Tom Topkin's website -  
mannlicherschoenauer.com

WE NEED VOLUNTEERS to organize hunting trips for our members. Africa, Argentina, and New Zeland come to mind or even a feral hog shoot here in the USA. The only rule is that participants use Mannlicher rifles. You can limit the amount of hunters or just post an inquiry in the next TMC that you are exploring putting a hunt together (with the location and what game will be available) to see how many members might be interested. Contact me at lynnlevengood@gmail.com, and I will answer any questions and do what I can to help  
**AUCTION ITEMS NEEDED.**

One highlight of the annual meeting is the live outcry auction where we auction off donated items. Please check out your loading bench, gun room/cabinet and bookshelf for any items which may be of interest to our members that you are willing to donate. Box them up and mail them to our president, Rob Blank, 1050 Jacklin Rd., Milpitas Ca.95035. LEL

## Mannlichers Afield

Your Editor with this spring's tundra Grizzly taken near Shishmaref, Alaska with his GK 30-06 using Hornady Superformance 180 gr SST bullets.

Dear Editor:

This is a picture of myself and my Mannlicher-Schoenauer Model 1950, 270 Win, and a 6 point, very large whitetail buck I shot in Dec. 1964, in North Eastern PA. On Thursday of the 1st week of gun buck season, I was heading up a logging road behind our cabin to drive for my uncle and a friend who were handicapped and limited to movement.

When I reached the top of the road, by a higher ridge, I decided to take a look for myself. As an inch of soft snow fell and it was cloudy, I moved to stop and stand and check the area out before heading down to a lower ledge. As I moved on, to my right I spotted the buck getting up slowly from its bed. I swung my Mannlicher to the right, aimed and fired a Rem. 150 grain round nose Core-Lokt and hit him in the chest. He went off the ledge and hit the ground hard. I followed a good blood trail down the ledge 25 yards where he was leaning against a stump. I tried to move him but I couldn't make him budge. So I gutted him out, but I still could not move him. I had to get the landowner, who was a logger, who was sharpening his mill saw. We busted the rope 3 times trying to get the buck up the ridge before reaching the logging road and heading down the hill to camp.

My Mannlicheer was given to me by my father, brand new, when I was 16 years old and was in the 11th grade in high school. It is the best rifle there ever was and still is today. I am now 74 years old and the newer guns will never surpass the Mannlicher's quality.

Sincerely, Robert Edmondson, Jr., Scranton, PA.
